Claim Amendments

This listing of the claims will replace all prior versions,
and listings, of claims in the application:

Claims 1-3 (cancelled).

Claim 4 (new): A storage arrangement, comprising:

a loading station configured for being connected to the
Internet; and

a data carrier having a non-volatile memory and a
microcontroller, said data carrier being connectable to said
loading station for allowing said microcontroller to identify
a user for a service provider on the Internet before
downloading data from the Internet and storing the data in
said memory.

Claim 5 (new): The storage arrangement according to claim 4,
wherein said data carrier is replaceable.

Claim 6 (new): The storage arrangement according to claim 4,
wherein said data carrier is a chip card.

Claim 7 (new): A method for secure loading of data,

providing a data carrier having a non-volatile memory and a
microcontroller;

connecting the data carrier to a loading station;

connecting the loading station to the Internet;

using the microcontroller for performing an identification of
a user for a service provider on the Internet;

subsequently, providing data from the service provider to the
data carrier if the identity of the user is authenticated; and

storing downloaded data in the memory in encrypted form.

Claim 8 (new): The method according to claim 7, wherein the
downloaded data is encrypted and the microcontroller decrypts
the encrypted data using a key stored in the data carrier.
